Summary

Data Scientist with 5+ years of expertise in building and deploying end to end Data Science and machine learning solutions. Skilled in time series analysis, predictive modelling, and leveraging cloud-based big data technologies to drive business outcomes. Adept at translating complex data into actionable insights and communicating effectively with senior stakeholders. Demonstrates a proven ability to solve business-critical challenges, particularly within cloud infrastructure and supply chain domains, using cutting-edge technology. Passionate about applying data-driven approaches to enhance decision-making and strategic initiatives.

Work Experience

Tiger Analytics

Senior Data Scientist

Jan 2025 - Present

- Led a predictive maintenance initiative using terabyte-scale data, enabling early failure detection and prescriptive actions, which will save ~\$1.5M annually in replacement costs for high-value components and significantly reduce unscheduled downtime.
- Mentored and coached junior data scientists in advanced machine learning techniques, fostering a culture of technical excellence and collaboration.

Data Scientist (Team Lead)

July 2023 – Dec 2024

- Led development of a Pricing & Promotions optimization tool that improved promotional effectiveness across product categories by 28% overall (category-level improvements ranging from +16% to +91%).
- Collaborated closely with cross-functional teams and stakeholders to understand business requirements and translate them into actionable data-driven solutions.
- Implemented processes to ensure alignment with business objectives and maintain transparency in data science processes.

Senior Analyst – Data Science

May 2022 – June 2023

- Architected end-to-end data science pipelines using open-source technologies, integrating with cloud platforms for improved scalability.
- Built and deployed innovative time series forecasting/demand forecasting/Optimization models to enhance planning processes along the Supply Chain.
- Developed intricate algorithms based on deep-dive statistical analysis and predictive data modelling.
- Identified patterns in customer behaviour, enabling data-driven decision-making and business growth.

Wipro Limited

Executive - Analytics

Oct 2020 – May 2022

- Analysed complex datasets to derive actionable insights for data-driven decision-making across business units.
- Designed and deployed predictive models using machine learning, improving operational efficiency.
- Leveraged statistical techniques to develop engineering and scientific solutions, ensuring CMMI-HM compliance.

Key Projects

Trade Promotion Management Framework (For a Fortune 500 Client)

- Migrated and enhanced a legacy modelling framework from a closed-source language to open-source, leveraging the latest functionalities and improving performance.
- Identified and addressed potential issues in legacy processes, ensuring new models were built on processes aligned with business objectives.

ETL Pipeline for Brand Marketing Dashboard (For a Fortune 500 Client)

- Developed the codebase for ingesting data from multiple sources, enabling the creation of a strategic brand marketing dashboard.
- Coordinated efforts between data engineers, marketing experts, and Consultants to ensure the dashboard met all stakeholders' needs while maintaining data integrity and performance.

Predictive Modelling Tool for Project Management (Quality Control) (Internal Project)

- Built and deployed a web-based tool across the organization, empowering project leads and managers to plan projects and sprints effectively through predictive modelling.
- Resulted in more than 50% reduction in time and effort spent by the team on external resources for getting the desired outcomes

Education

Birla Institute of Management Technology (BIMTECH)

Post Graduate Diploma in Management (MBA), Operations

University of Kerala

Bachelor of Technology, Mechanical Engineering

Technical Skills

Machine Learning & Deep Learning: Scikit-learn, Keras, PyTorch, TensorFlow, Decision Trees, Regression, Statistical Modelling, Bayesian Modelling

Data Analysis & Visualization: Python, R, Pandas, NumPy, SciPy, Matplotlib, Seaborn, R Shiny

Cloud: AWS (Certified Cloud Practitioner), Microsoft Azure, Databricks

Other Tools: SPSS Modeler, Git, SQL, Advanced Excel

Certifications

Deep Learning Specialization (Deeplearning.ai)

Python for Statistical Analysis (Udemy)

Natural Language Processing Specialization (Deeplearning.ai)

TensorFlow Developer (Deeplearning.ai)

Bayesian Methods for Machine Learning (Coursera)
